Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by the admitted prior art in view of Matern.

The admitted prior art (Fig. 2 of the current specification) discloses a card connector assembly comprising:

a substrate (51) on which wiring traces (52) are formed and an electrical component (53) is mounted;

a plurality of contact lands (54) connected to the respective wiring traces and arranged along an edge of the substrate;

connecting traces (55) that interconnect the respective contact lands and the respective wiring traces.

The admitted prior art does not disclose lands having a contact area for a test pin.

Matern (US 5,877,033) discloses (Abstract, lines 6-10 and Fig. 1-3) lands (36) having a contact area for a test pin.

Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the admitted prior art connector with lands having a contact area for a test pin, as taught by Matern, to detect nonsoldered component leads (Matern, col. 2, lines 59-61)

With regard to claims 2-3, the admitted prior art when modified by Matern, disclose (Matern) that some of the lands have a width greater than that of the corresponding connecting trace and disposed in vicinity of corresponding contact lands.

With regard to claim 4, the admitted prior art when modified by Matern, disclose (Matern) that the plurality of lands are arranged in a line (Fig 3).

Art Unit: 2833

With regard to claim 5, the admitted prior art when modified by Matern, disclose that a housing covers the substrate and the lands are not covered (Matern).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alexander D Gilman whose telephone number is 571 272-2004. The examiner can normally be reached on Monday-Friday, 10:30 a.m. - 8:00 p.m.
